## Oceans & Ecosystems

Created by Erin Lane

Science vocabulary term sheet included – great for a study guide!

### Oceans & Ecosystems Vocabulary

- Continental Shelf:** A broad, shallow edge of a continent.
- Continental Slope:** The steep slope where the continental shelf drops off into the ocean floor.
- Trench:** A long, deep slit in the ocean floor, where crustal plates are submerging.
- Abyssal Plain:** A large, flat region of sea floor.
- Sea Mount:** A large volcanic mountain rising from the ocean floor.
- Mid-Ocean Ridge:** A mountain chain found where sea floor spreading occurs.
- Fathom:** A sea mount that rises above sea level.
- Fathom:** A measurement that is equal to six feet of nautical depth.
- Pressure:** Force (push) per unit of area.
- Surface Current:** A mass of water that is pushed horizontally across the ocean's surface by the wind.
- Temperature Current:** A mass of warm water floating above cold water.
- Salinity Current:** A mass of water with a different salt content.

### Continental Shelf

A broad, shallow edge of a continent.

### Continental Slope

The steep slope where the continental shelf drops off into the ocean floor.

### Trench

A long, deep slit in the ocean floor, where crustal plates are submerging.
